Education & Credentials

Bachelor of Technology in Computer Science & Engineering India
Claude Certified Architect (Anthropic) • 31 Professional Certifications 2020 - 2024
Specialized Credentials: Anthropic Certified Claude Architect, Spring Boot Enterprise Backend, Cloud Systems Architecture, Distributed Microservices, Docker & Kubernetes, and Zero-Trust Cyber Security.

Experience

Accenture accenture.com
Software Engineer • Healthcare & Life Sciences 2024 - Present
Delivering mission-critical backend systems, scalable microservices, and automated enterprise workflows for healthcare clients using Java, Spring Boot, and cloud technologies.

- Architected and deployed production-grade Spring Boot microservices and RESTful APIs handling high-throughput healthcare data with 99.9% uptime compliance.
- Engineered relational schemas and persistence layers in PostgreSQL, pairing with distributed Redis/Valkey caching to reduce query response latency by 45%.
- Containerized multi-service architectures using Docker and built robust automated CI/CD deployment pipelines, cutting release friction and eliminating manual regressions.
- Collaborated with cross-functional architecture and security teams to implement strict zero-trust data access controls adhering to HIPAA and enterprise governance standards.

MPSedC (M.P. State Electronics Development Corp.) mpsedc.mp.gov.in
Software Engineer • Digital Public Infrastructure 2023 - 2024
Engineered high-volume citizen services and state public governance portals supporting millions of daily queries.

- Developed and maintained core backend workflows and citizen-facing services using Java, Spring MVC, and Oracle SQL.
- Optimized heavy analytical and transaction SQL queries, indexing, and connection pools, slashing peak-hour latency by over 40%.
- Engineered role-based access control (RBAC) mechanisms and audit trails for inter-departmental data exchanges.

Projects

Aegis MCP Registry & Enclave Gateway aegis-mcp-registry.vercel.app
Creator and Lead Developer 2024
Autonomous AI agent tool registry and TEE Hardware Enclave key gateway built with Rust, Next.js, TypeScript, PostgreSQL, and Docker. Verified smart contracts across 100+ EVM networks while ensuring private keys never leave the hardware enclave.

ZeroTrust-Health zero-trust-health.vercel.app
Lead Architect & Developer 2024
Zero-Trust healthcare data layer providing cryptographic audit trails and fine-grained access control compliant with HIPAA and GDPR. Built using Spring Boot, React, PostgreSQL, and Docker.

Enterprise AI Knowledge Hub & Multi-Agent Assistant enterprise-ai-knowledge-hub.vercel.app
Architect & Developer 2024
Orchestrated multi-agent RAG pipelines over enterprise knowledge repositories using FastAPI, LangChain, Claude 3.5 Sonnet, and ChromaDB vector indexing.

Skills

Languages & Core Technologies
Java • Python • Rust • TypeScript • JavaScript • Go • C++ • SQL • Bash • HTML5 • CSS3

Frameworks & Backend Engineering
Spring Boot • Spring MVC • FastAPI • Node.js • Express • Next.js • React • LangChain • Microservices

Databases & Cloud Infrastructure
PostgreSQL • Redis • Valkey • Oracle SQL • ChromaDB • Docker • Kubernetes • CI/CD Pipelines • Git • Zero-Trust
